13. (New) A refrigerator shelf comprising:

at least one support panel formed of at least one of a sheet of glass and a sheet of plastic, the at least one support panel having a plurality of corners; and  
a plurality of coverpieces including at least one cornerpiece covering just one of the plurality of corners of the at least one support panel.

14. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces comprises plastic.

15. (New) A refrigerator shelf according to claim 13, wherein the plurality of coverpieces comprises a plurality of cornerpieces each covering just one of the plurality of corners of the at least one support panel.

16. (New) A refrigerator shelf according to claim 13, wherein the plurality of coverpiece comprises at least one coverpiece covering, in full or in part, just one side of the panel.

17. (New) A refrigerator shelf according to claim 15, wherein the plurality of cornerpieces has a length and shape such that the plurality of cornerpieces covers the entire periphery of the panel.

*BSF Bent*

18. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces is adapted to fit together with another one of the plurality of coverpieces.

19. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces is adapted to slip or slide in another one of the plurality of coverpieces so as to form a telescopic set of coverpieces.

20. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces is attached to the at least one support panel via at least one internal relief allowing the at least one of the plurality of coverpiece to be anchored in at least one groove made on the at least one support panel.

21. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces comprises or is adapted to receive at least one mean of assembly with a chassis of an item of furniture.

22. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces comprises or is adapted to receive at least one stiffening fin.

23. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces comprises or is adapted to receive at least one rim configured to prevent liquids from running off.

24. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces comprises or is adapted to receive at least one buffer strip.

25. (New) A refrigerator shelf according to claim 13, wherein at least one of the plurality of coverpieces comprises or is adapted to receive at least one grip.
